## How it works

### WHO WE ARE?

Seed to Oaks is leading a movement of social good through the local church by helping neighborhoods address their most urgent needs, such as health, jobs, and education. Whole Health is an effort that helps local church members and local health professionals collaborate to host free clinics that address health needs within your community.

### WHY INITIATE A HEALTH CLINIC?

- A powerful application of the Church's gifts.

---

- A practical means of proclaiming the gospel.

---

- A gain of the public trust due to your devotion to local good.

### Recruit Your Mobilization Team

Based on specific principles, your Whole Health strategist will help you identify ideal church members to implement your health efforts.

### Host Your Health Clinic

Each member of your mobilization team will be assigned a specific task, and together, coordinate a health clinic providing free medical and dental services for up to hundreds of families in your neighborhood.

### Follow Up with Neighbors

Using relationships forged at both the professional and local church level, follow up with your new neighbors so you can continue to serve them and share the Good News.
